Hose storage

Easy wrap around & lock down hose storage.

20% Performance increase with new generation motor

- High-speed turbine for increased air flow at 69 litres/sec
- Lighter and more compact in design
- Bypass cooling for wet- and dry vacuuming
- 800+ Hours working life
- Powerful suction at 259mbar
- Designed to run continually, day in and day out

20% Volume increase with new canister

- Impact-resistant, robust construction
- Smooth interior walls for quick and easy empty
- High stability with large wheels and castors

215 Km/h Blowing function

- Blowing function can be used parallel to vacuuming
- Insert at the suction hose, lock it and blow!

Clever Transport

- On-board storage of all the standard accessories

Easy On – Easy Off Switching

- Large top mount rocker style switch
- Power socket with auto on/off switching

Stable all round

- Bigger wheels (130mm) for easy rolling
- Rubberised wheels for quiet & scratch-free work

Intex starmix®: BENEFITS AT A GLANCE

- Designed and crafted especially for plaster dust
- Constant powerful suction from the high-speed turbine and extra-large filters
- Innovative 215 km/h blowing/dust-down function

MADE IN GERMANY

Bag-Free use with superior filtration

- 7,200 cm² of polyester filter surface for 99.9% dust retention
- Soft-fit polyester pre-filter eliminates the need for dust bags
- Washable for long life
- Designed for wet & dry use
- HEPA filters available for hazardous dusts

Innovative connection

- Twist & lock hose attachment for easy tool-free connection
- Swivelling hose attachment for twist-free use
- Interlocking hoses for extra length when required

Permanent Clean

Work without interruption, with the self cleaning filter in wet or dry conditions!

New generation professional dust extractor with unique self cleaning 'Permanent Clean' filter system that cleans periodically during machine operation, rather than during breaks as most other self clean systems. Has twin cartridge filters for efficient extraction of fine dusts, including concrete. Can be used wet or dry. Supplied complete with quality vac accessory kit. Hepa filters available for extraction of hazardous materials.
