

GT10000ES PROFESSIONAL POWER GENERATOR

8500 WATT GENERATOR with ELECTRIC START

SINGLE PHASE - 230V

The heavy duty 25L fuel tank and the industrial quality of the GT10000ES will keep you in power all day. With all the unique GT POWER features like industrial air cleaner & muffler system (for cleaner quieter operating) and superior quality alternator & automatic voltage regulator (AVR) (for more stable power output) this state of the art generator empowers you to tackle any task.

With the capability of running multiple powertools, lights and industrial equipment the GT10000ES is ideal for running the bach, farm shed or emergency back-up power.

* Featuring a heavy duty outlet plug with adapter cord for maximum generator output
- suitable for a welder up to 200A
